Centurion

3 years 6 months

Project Management Officer - Business Analyst - Innovation Solutions & Delivery

September 2016 - February 2020 (3 years 6 months)

Perth, Australia

As a Lead in BA Analytics Manager, I serve as a liaison and mediator between multiple quality assurance teams of Centurion, including Operations, Finance, Commercial, Data Management, Contract Service Delivery, Asset Management, Supply Chain & Logistics, and Innovation & Technology Solutions.

I also collaborate closely with the Core Information Technology team. My role involves transcribing stakeholder requirements and managing projects to ensure seamless integration and optimal results.

- BA process and project document analysis
- Business case development and viability analysis
- Mapping of business processes for effective performance management
- Re-engineering of business processes through critical analysis and review of technical and commercial inputs
- Active engagement in data analytics
- Accelerated data warehouse project with focus on master data management, data source optimization, accuracy, communication and training, data quality assurance, and testing through data envelopment analysis.
- Management of user acceptance testing, reporting, analysis, and feedback
- Facilitation of communication between business and technology, as well as cross-functional, cross-departmental, customer, technical, and crisis communication
- Research, technical support, KPI reporting, and BI
- Project management of systems and technology

Accomplishments

- Promoted as Technology Project Management Officer for the newly created Innovation, Solutions & Delivery department under IT Core
- Central point of contact for Centurion's newly digitalized systems training and enterprise-wide business processes such as Electronic Whiteboard, Electronic Work Diaries, Investigation Workflows, Unified Job Management System, and customized online services portals for key clients
- Successful implementation of the Anglo-American Business Onboarding Process at East Coast Centurion branches in Brisbane and Mackay within the first 90 days

Supply Chain Freight Officer – Non Conformance Administrator - Data Analysis Officer

September 2016 - March 2018 (1 year 7 months)

Perth Airport

- Proven track record of professional and productive logistics coordination, data analysis, and software system analysis
- Expertise in logistics and transport operations, including freight management, transportation, and outstanding freight movement administration
- Operational data management for major client Rio Tinto's offsite Receivables (OSR) facility, utilizing systems such as SAP, CTC ERP, freight management, Job Management System, and Transport Management System
- Managed dangerous goods transport documents and permits for oversize/overweight freight
- Conducted revenue leakage investigation and freight cubic auditing and optimization
- Improved warehouse management processes, including recording and adopting business processes
- Designed and implemented a new macro-based VBA excel spreadsheet solution for reporting to operations management
- Generated, reviewed, analysed, and resolved Non-Conformance Reports (NCRs) from major clients Rio Tinto, South32, CPM, and Murrin

Accomplishments:

- Received Employee of the Month award for designing software solutions and implementation of Rio Small's Pallet vs. CTC Manifest Discrepancy report
- Terminated 65% of nonconformance issues with increased customer satisfaction
- Promoted to Business Analyst position in Enterprise Core IT department from Operations Data Management team.

Family Business - Education Management -Local Software Development Firms
Project Consultant - Education Management
February 2013 - September 2016 (3 years 8 months)
Ahmedabad, Gujarat, India

- Project Consulting and Administration role in Local Software Development Industry (from an outsource perspective): This role involves providing consulting and administrative support to software development projects in the local industry. The focus is from an outsource perspective, meaning the individual is likely working with or for a company that provides outsourcing services to clients in the software development industry.
- Lead Coordinator role at an Educational Institute with Private Tutoring Experience: In this role, the individual was a lead coordinator at an educational institute. Additionally, they have experience in private tutoring, which suggests they may have also provided one-on-one instructional support to students in a variety of subjects.

Centurion
SAP Officer - Manifesting & NCR Administrator
June 2009 - January 2013 (3 years 8 months)
Perth, Australia

- Skilled in coordinating, recording, and creating consignments using versatile systems (SAP, Freight Management, D3 data entry terminal, Dispatch Manager, and Excel Spreadsheet applications)
- Experienced in arranging and reviewing dangerous goods transport documents and organizing paperwork and permits for oversized/overweight freight
- Adept in resolving freight discrepancies and generating, reviewing, and analysing 48-hour outstanding freight movement reports in Centurion web-based system
- Expert in recording, amending, and adopting processes to manage storage stock, obsolete stock, return to vendor freight, and collection by vendor freight
- Designed and implemented a new macro-based VBA Excel Spreadsheet application for reporting purposes to improve precise freight tracking and trailer utilization
- Skilled in managing Rio Tinto Non-Conformance Reports (NCR), generating, reviewing, analysing, and investigating NCRs from the major client and resolving issues raised by mine site departments and distribution centres

- Performed manifesting tasks as a member of the operations supervisor crew on Saturdays
 - Experienced in implementing a new automated manifesting system and communicating changes to the operations admin manager, IT development director, and other supervisors
- Accomplishments
- Awarded employee of the month for designing and implementing the Rio Smalls Pallet vs. CTC Manifest Discrepancy Report based on VBA programming under Excel Spreadsheet Application
 - Terminated NCRs due to scanning non-compliance with 95 % Accuracy.

DB Schenker

Costing Officer-Air Import Department

January 2008 - October 2008 (10 months)

Sydney, Australia

- Invoicing and Target Costing: Proficient in invoicing and target costing and able to produce cost reports.
- Customer Communication: Excellent communication skills and able to communicate with customers regarding tax invoices, pricing, and cost accounting.
- Job Costing and Cost Variance Analysis: Experienced in job costing and cost variance analysis, able to record, review, and investigate cost variations and contract price movements.
- Forecasting and Operational Risk Management: Ability to assist with forecasting and operational risk management.
- Cost System Maintenance and Implementation: Skilled in cost system maintenance and implementation, and able to review and strengthen systems and processes for efficiency.

Additional Skills:

- Able to investigate data for the cost of proposed expenditures, quotations, and estimates.
- Can provide information to assist in determining and calculating quotations and tenders for future business.
- Experienced in internal communication with sales and account departments.
- Verified recorded transactions and reported irregularities to management for the recent "Take over" of Bax-Global USA.

Accomplishments:

- The whole and sole point of contact for all costing related queries for the recently taken over venture - Bax-Global USA at that time.
